

Project Hawkeye 1

Critical Design Review (CDR)

29th August 2025

Agenda

- Design and Development Approach
- System Design
 - System Architecture Overview
 - Security
 - Data Backup
 - Data Archival and Housekeeping
 - Export Data to Link Analysis software
- Software Features
 - Workflow
 - Features
- Data Migration Tool
- DBMS UI Demo

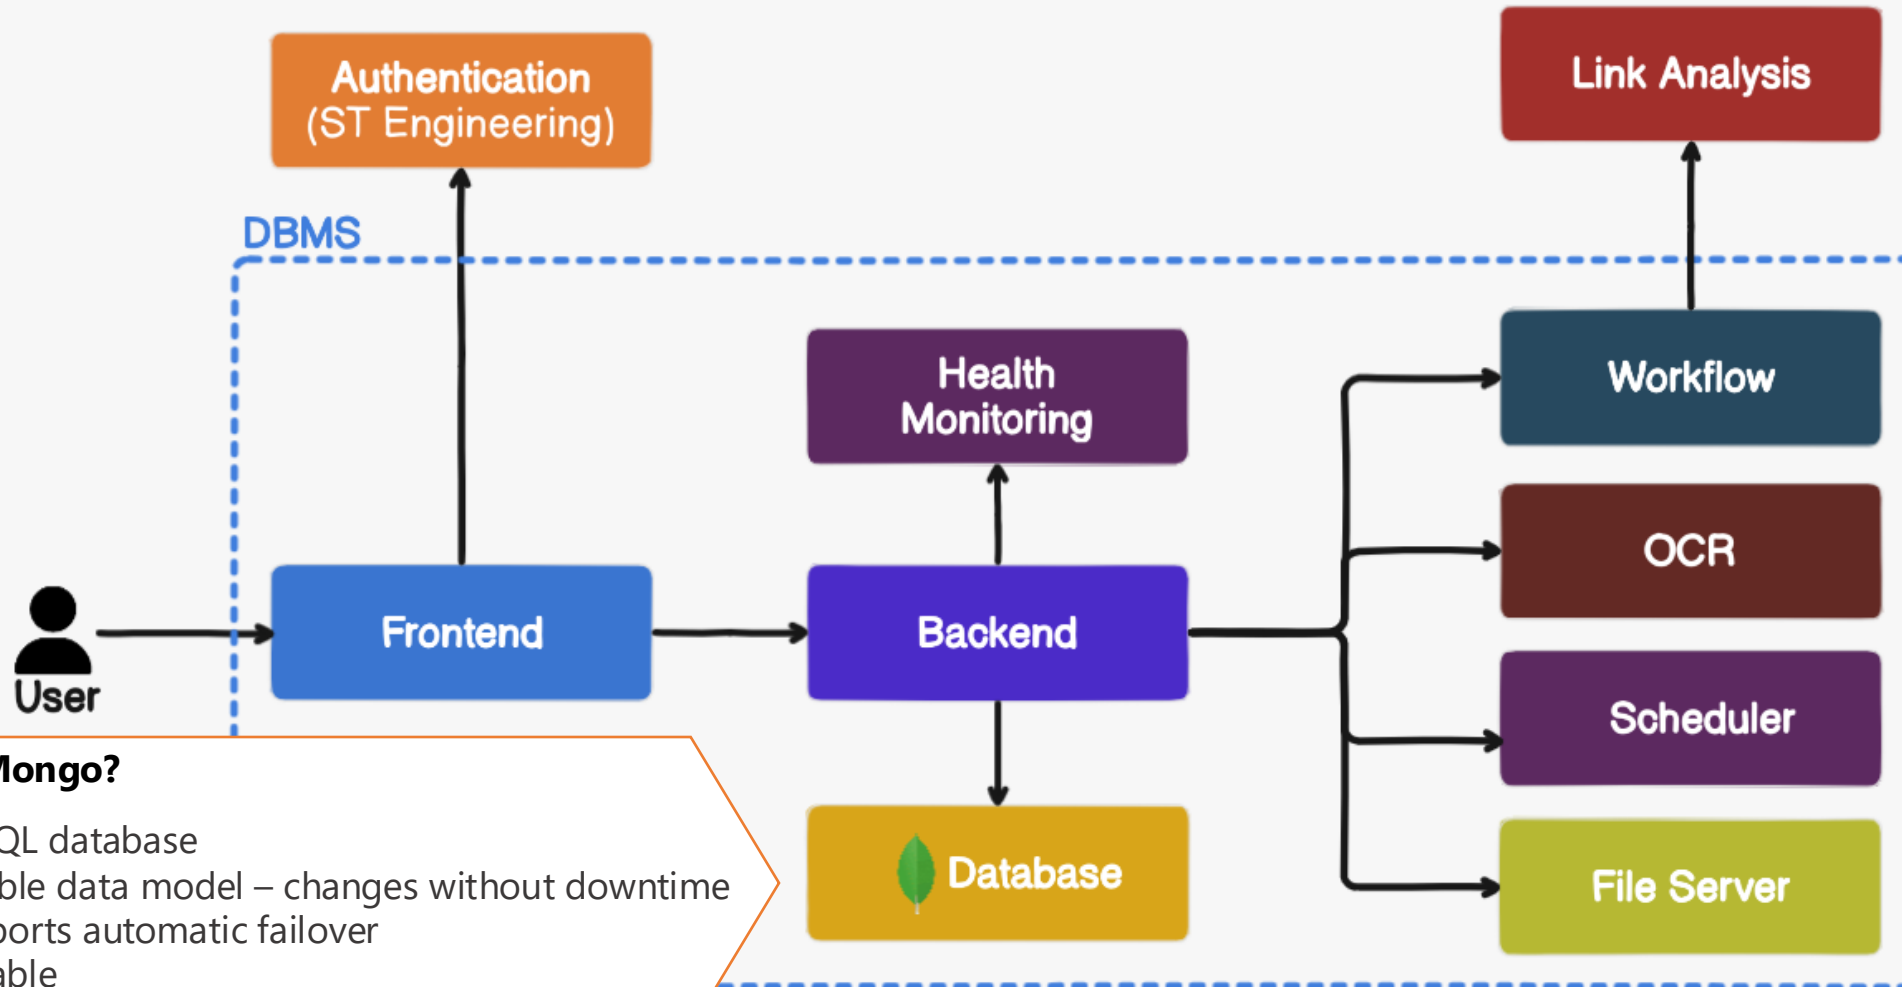

Design and Development Approach

- Agile methodology is adopted as the design and development approach, which provides a flexible and adaptive approach.
- Two software verification and iteration are scheduled:
 - Oct 2025;
 - Jan 2026;

System Design

System Architecture Overview

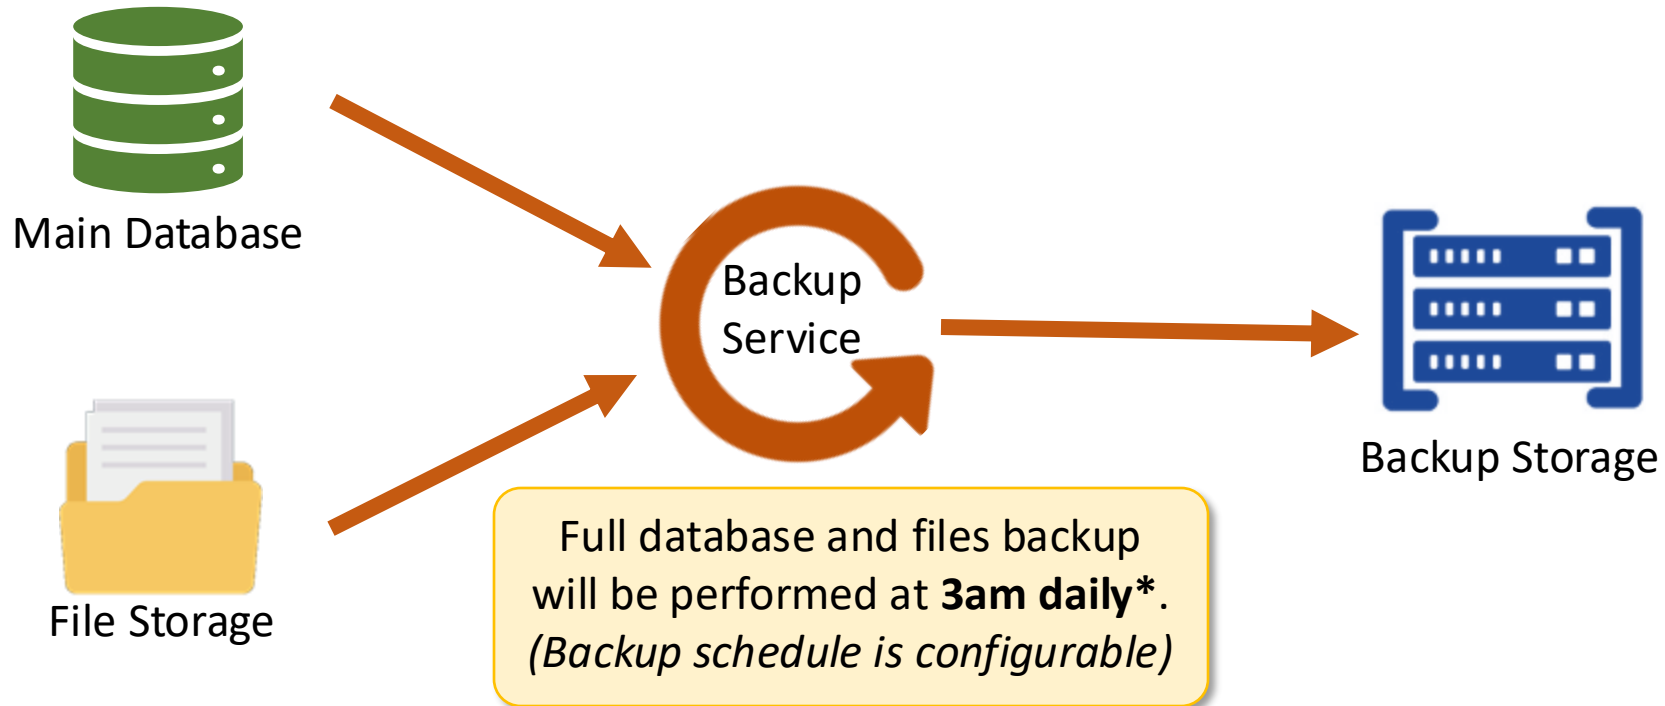

Why Mongo?

- NoSQL database
- Flexible data model – changes without downtime
- Supports automatic failover
- Scalable

Security

Key Areas	Design Approach
Infrastructure & Servers	<ul style="list-style-type: none">• All servers and infrastructure shall be hardened (AFE);• All servers shall installed with anti-virus/malware software to scan for vulnerabilities regularly;
Data Protection	<ul style="list-style-type: none">• Implement TLS (Cryptographic protocol) to provide data encryption for communication over the network;
Authentication & Authorisation	<ul style="list-style-type: none">• Use Keycloak for authentication and role-based access control
Security Testing	<ul style="list-style-type: none">• Use SonarQube to run SAST (Static Analysis) regularly, which can detect security vulnerabilities
Security Monitoring	<ul style="list-style-type: none">• Implement logging and auditing to track user access and changes to data;• Monitor logs, detect anomaly behaviour

Data Backup

* - Default setting & value is configurable

Data Archival & Housekeeping

- Default data retention period is 3 years. This is configurable.

Data Archival

Data Archival is scheduled to be performed annually.
(Archival schedule is configurable)

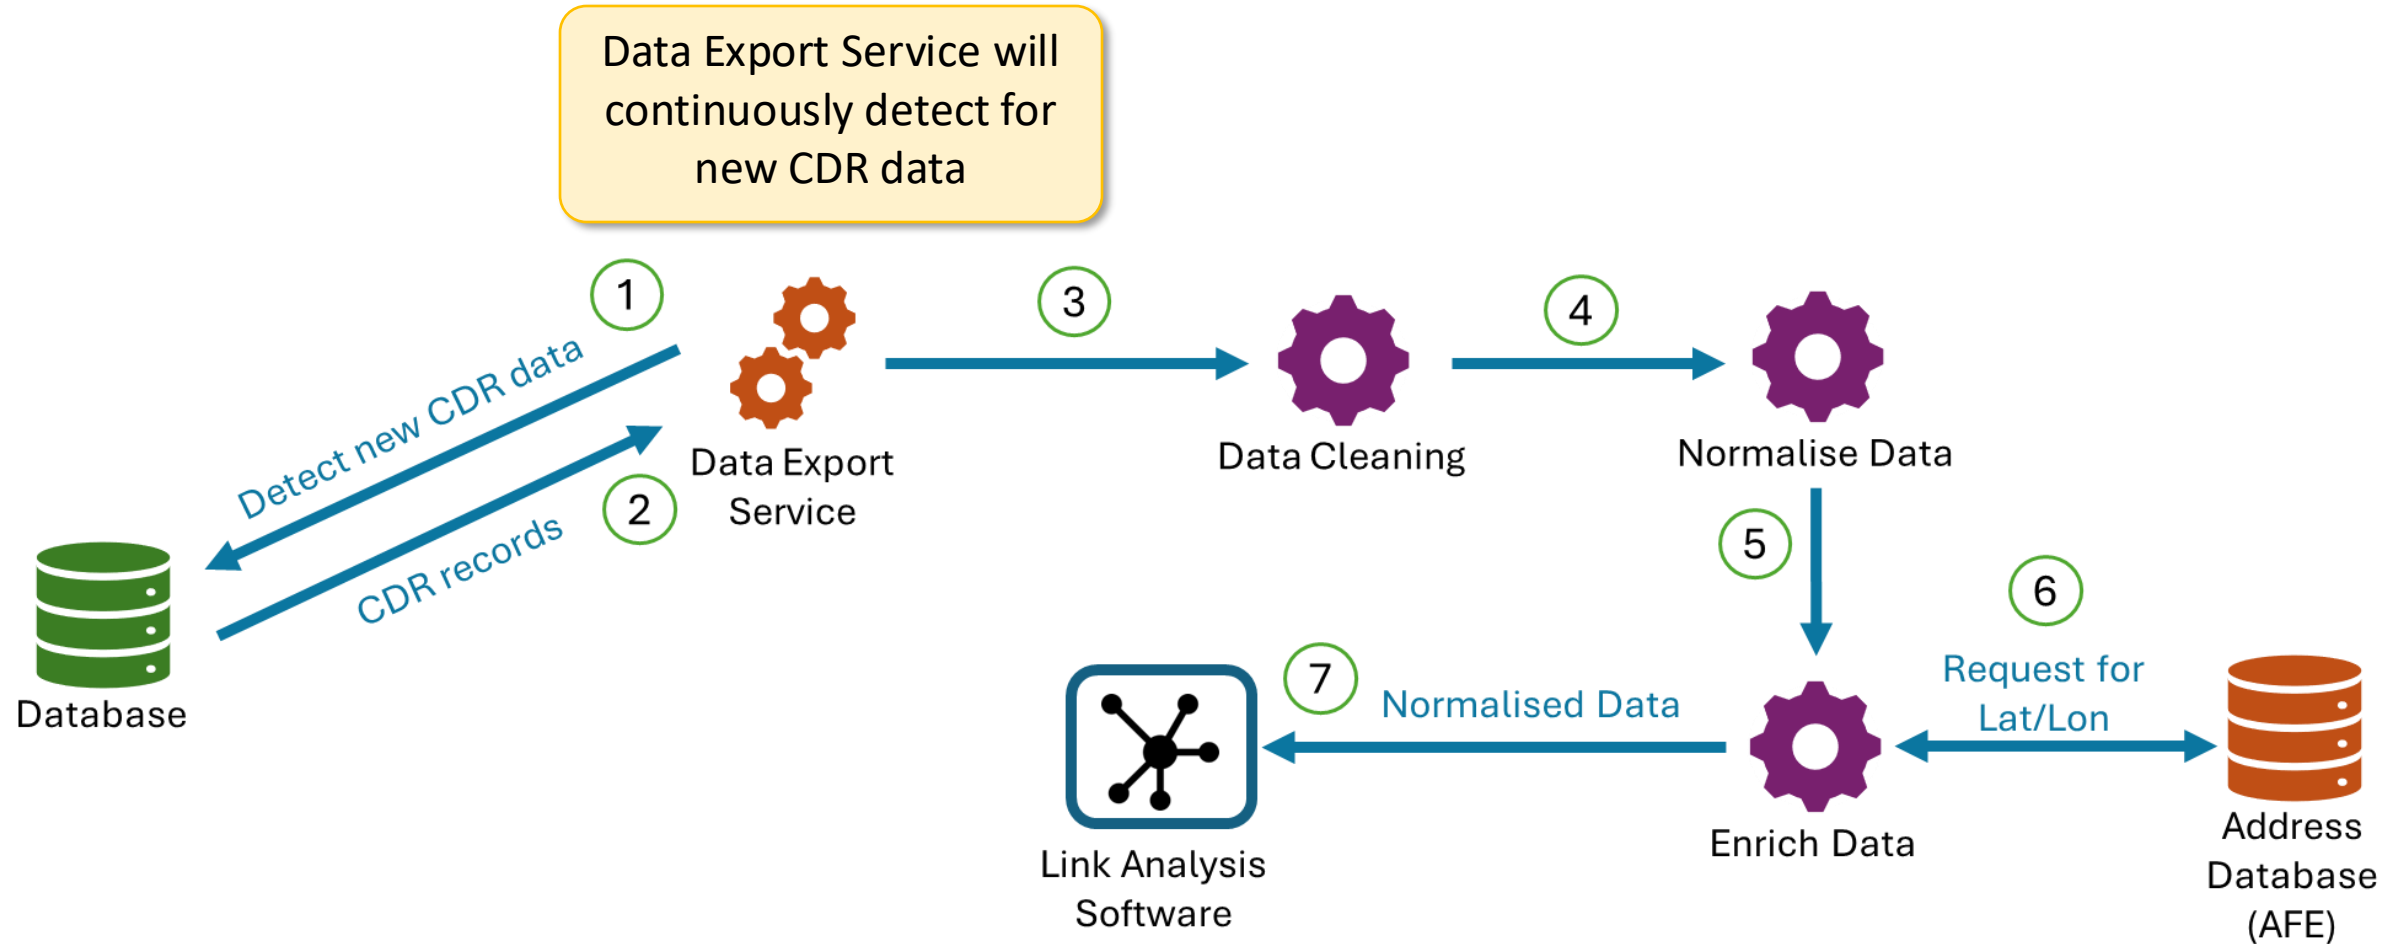

Housekeeping

Data Housekeeping is scheduled to perform after Data Archival.

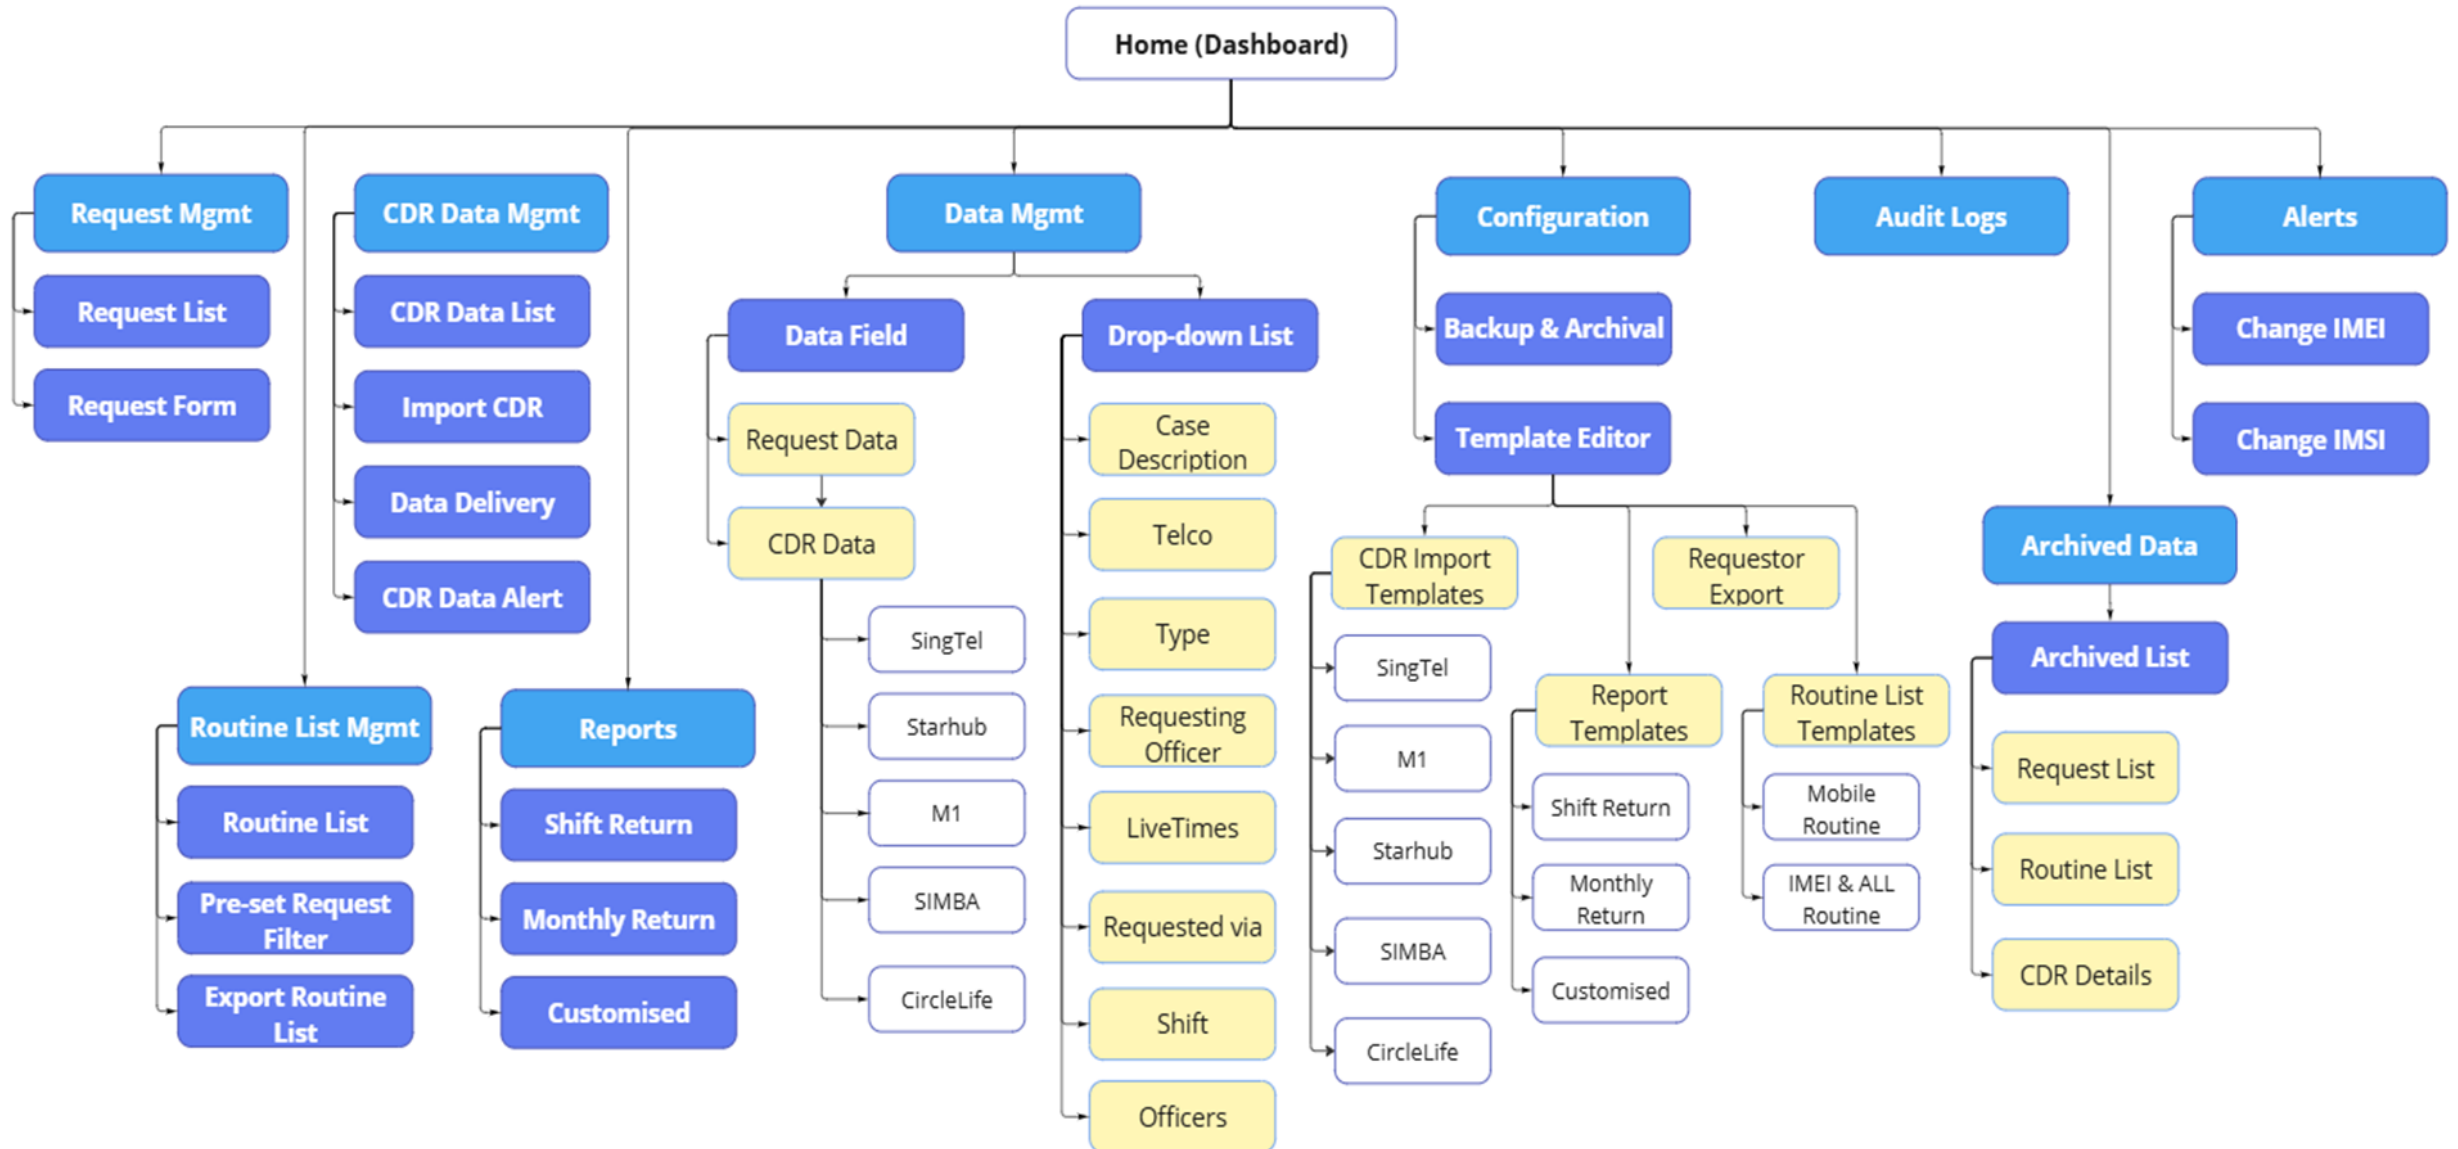

* - Default setting & value is configurable

Export data to Link Analysis

Software Features

DBMS Features

Dashboard

Routine Requests

Urgent Requests

Shows the number of new requests for each telco per week.

Shows total number of CDR requests for each telco per week.

CDR & SS value includes urgent requests

per Week

Total urgent requests (CDR + SS)

	SS	CTC	Urgent
	15	20	3
Starhub	10	10	4
M1	20	0	1
SIMBA			6
Circles Life			2

Total Requests

100

Shows request completion progress for each dept

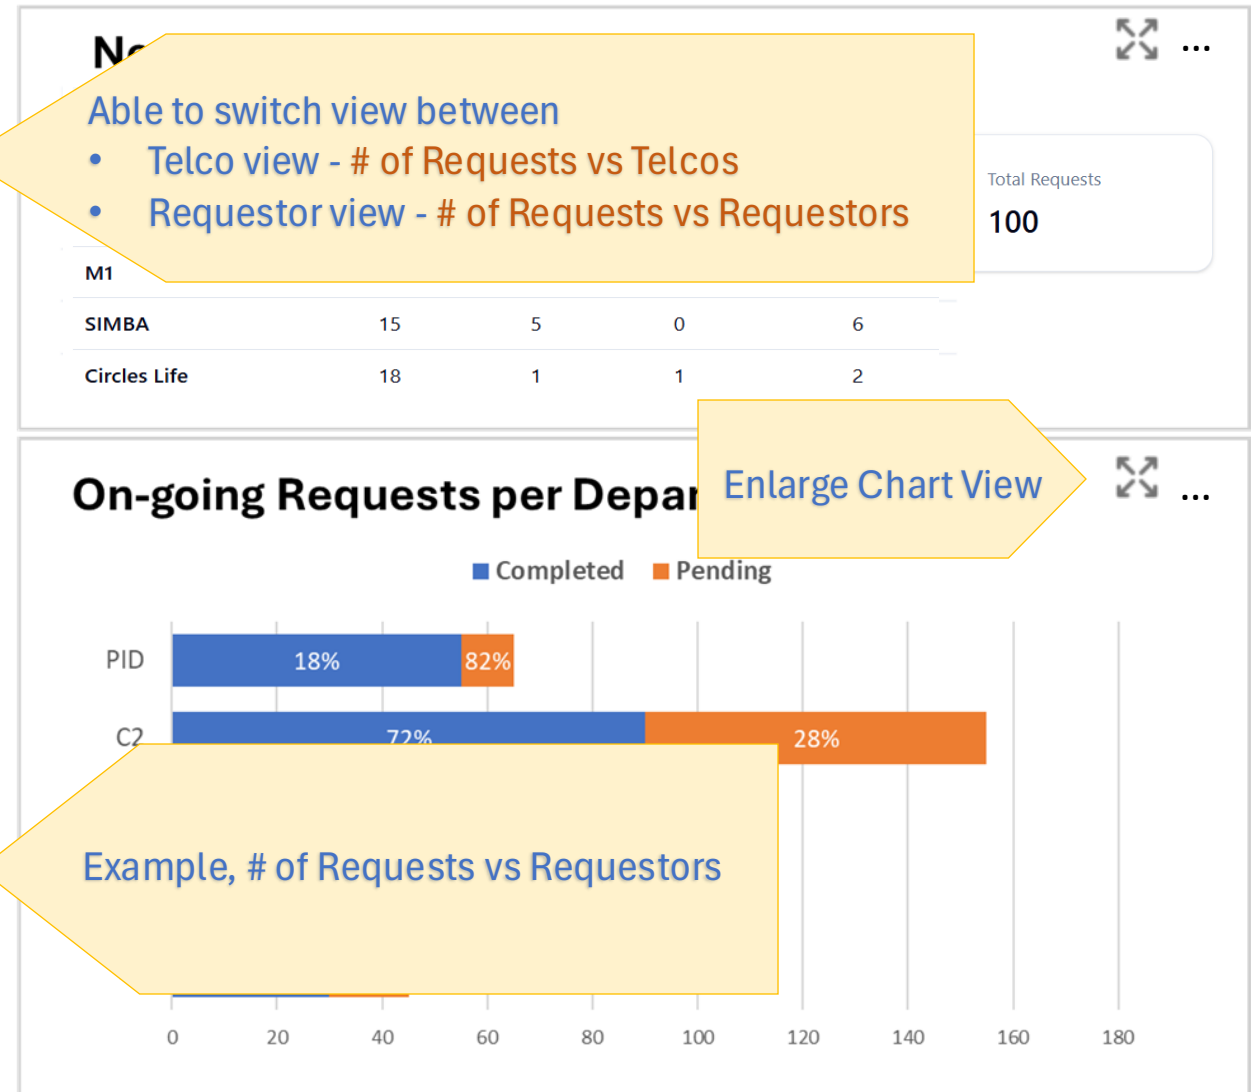

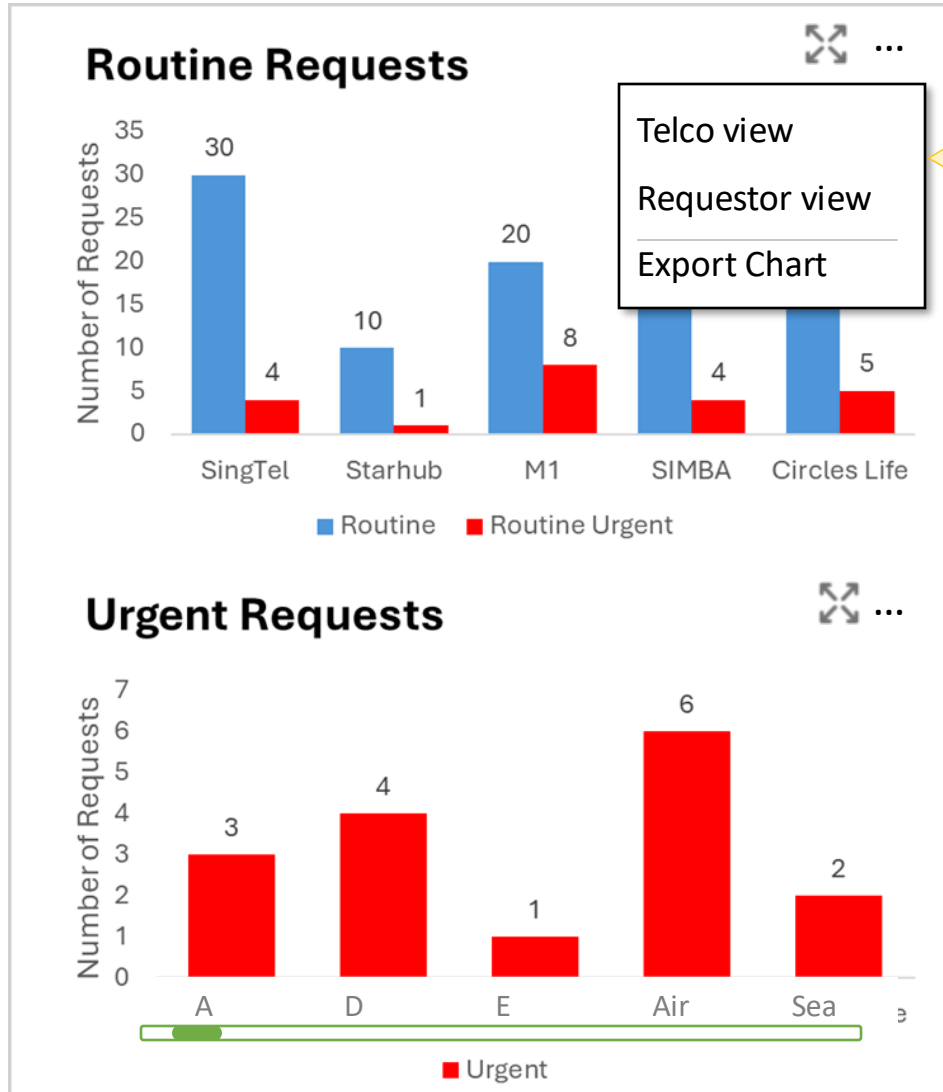

On-going Requests per Department

Completed(%) =
Total number of requests fulfilled /
Total requests from dept

Shows total number of Urgent requests for each telco on weekly basis, including both CDR and SS requests.

Dashboard Features

Type of Requests

CDR

- Routine CDR Request
- Urgent CDR Request
- Routine-Urgent CDR Request

SS

- Routine SS Request
- Urgent SS Request

CTC

- CTC Request

Request Created via

- 1) Manual key in
- 2) Import form with **structured data** (Auto-populate)
 - Using OCR for PDF;
 - Word/Excel;
 - Table in Email content/body (.MSG/PDF format)
- 3) Import form with **unstructured data** (Email)
 - View content from Email;
 - Select and copy Email content;
 - Paste the copied content to the request form
- 4) Duplicate from existing requests

Request Extension

- Types of extension:
 - Extend **Request Period** (applies to request start and end date)
 - Change **Service Provider**
 - Change **Project Name**

Request can be extend via

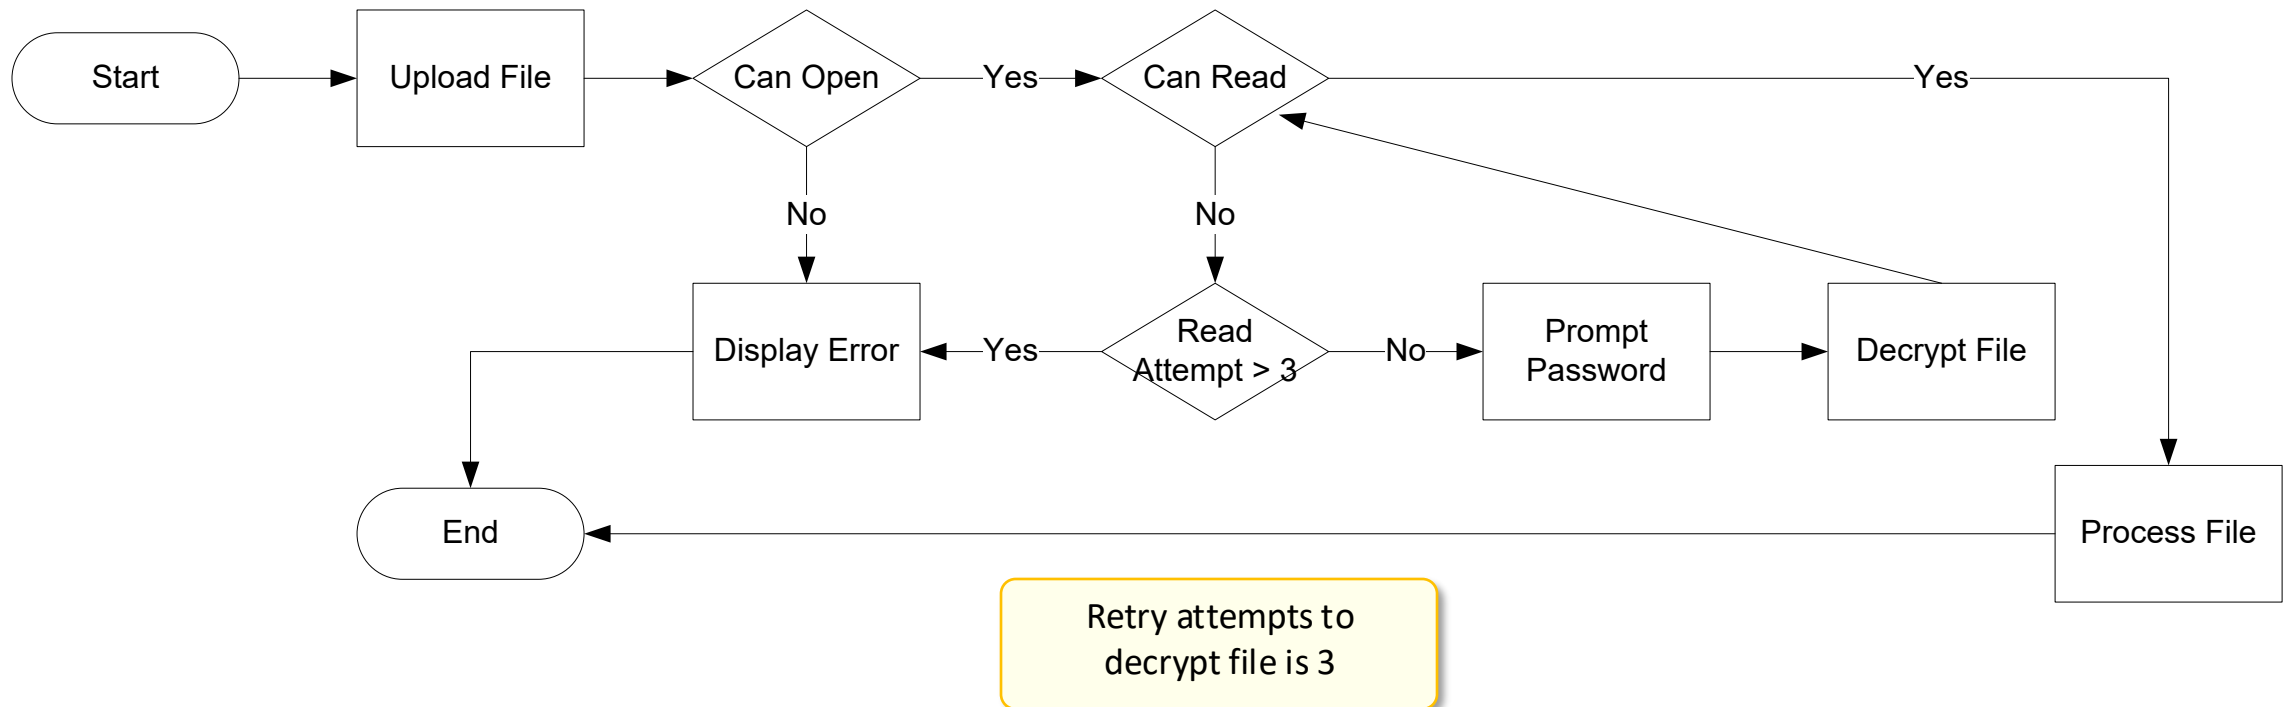

- 1) Manual key in
- 2) Import form with **structured** data
 - Using OCR for PDF;
 - Word/Excel;
 - Table in Email content/body
- 3) Import form with **unstructured** data (Email)
 - View content from Email;
 - Select and copy Email content;
 - Paste the copied content to the request form

Request Form (OCR)

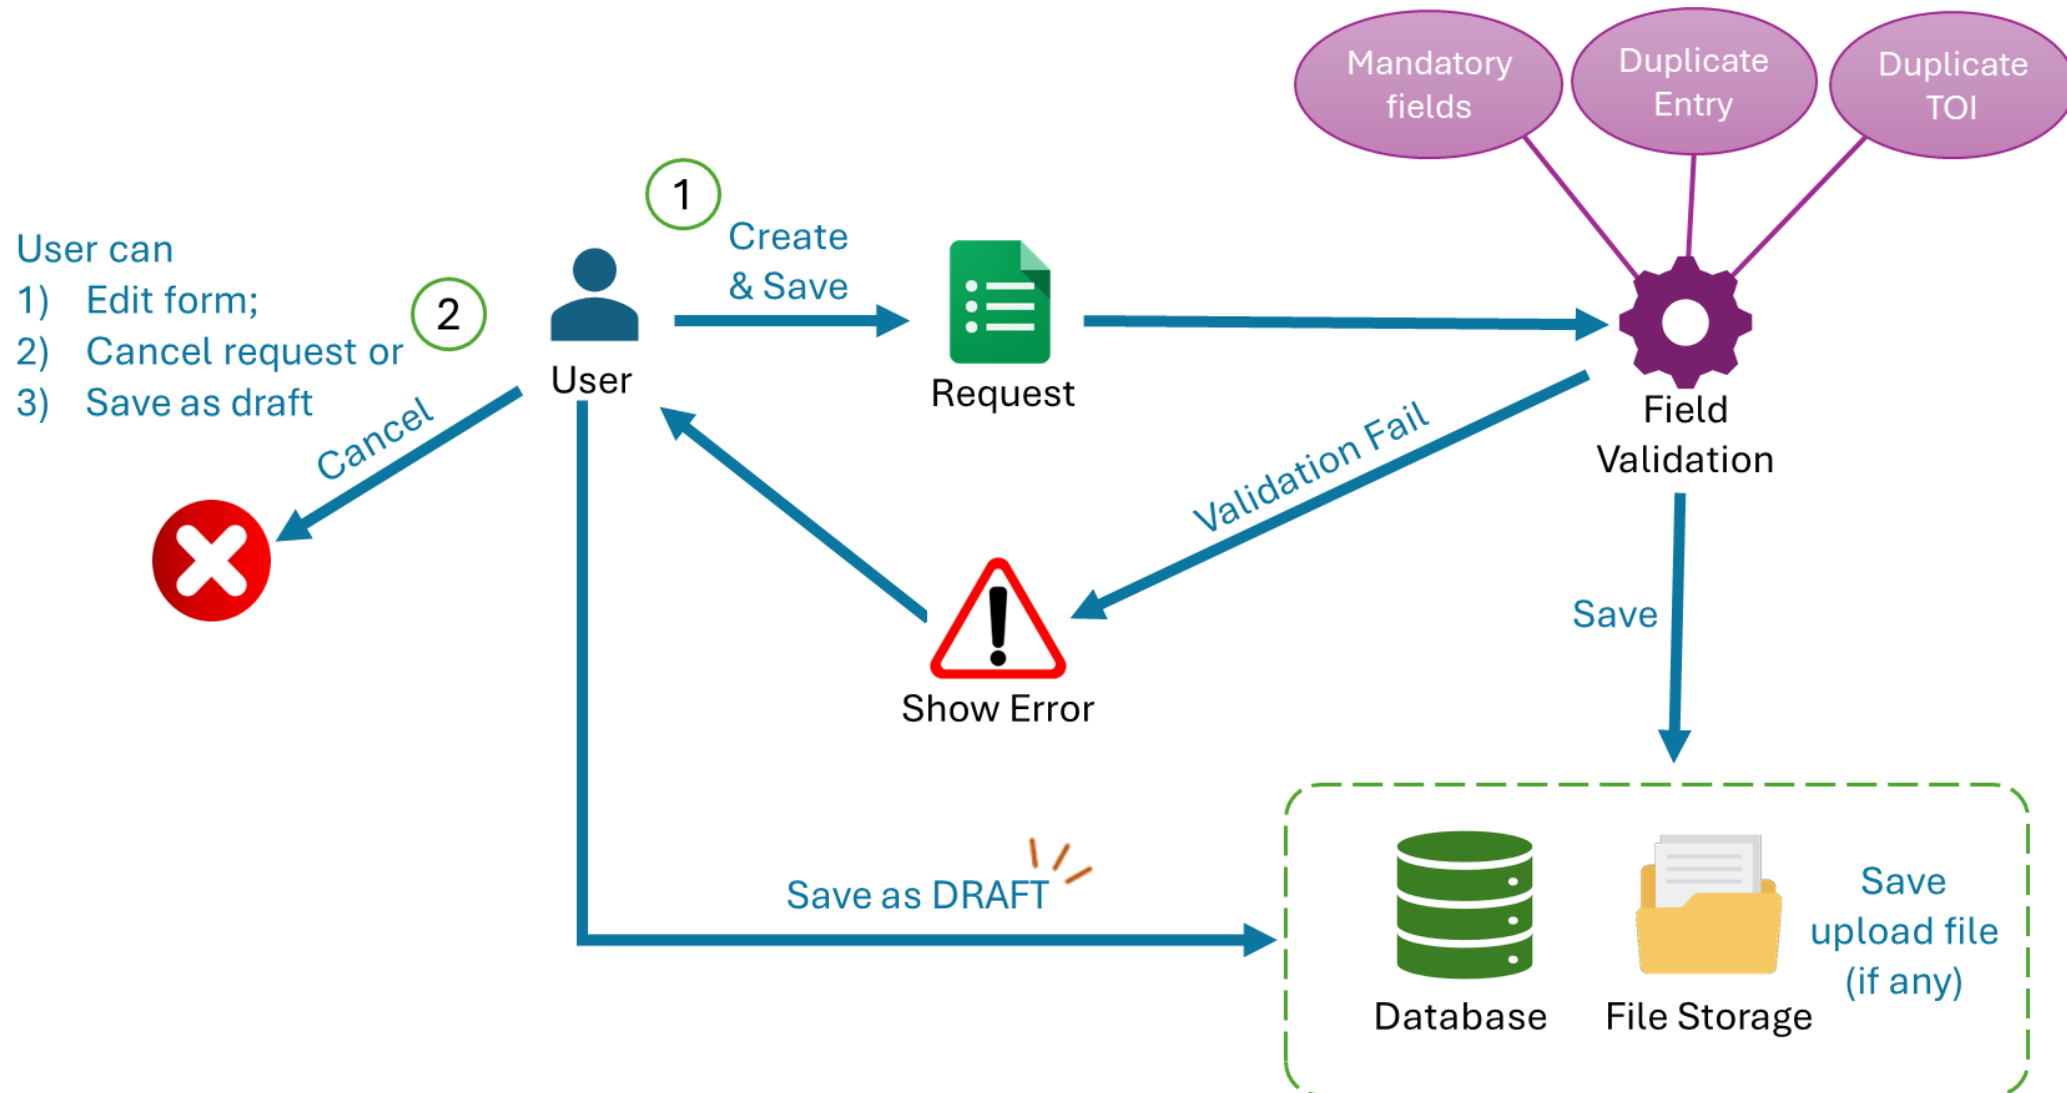

- Improve OCR accuracy:
 - ✓ Tested multiple CDR sample forms with the refined pdf text extractor, which yields high accuracy;
 - ✓ When the **new** Request Form Design is approved,
 - Get the **new** Request Form template and samples;
 - Consult ST/User on creating and populating the form with synthetic data, which should be as close to the actual operational data as possible;
 - Verify the performance and observe its accuracy through more tests.

Uploading encrypted files^{!!}

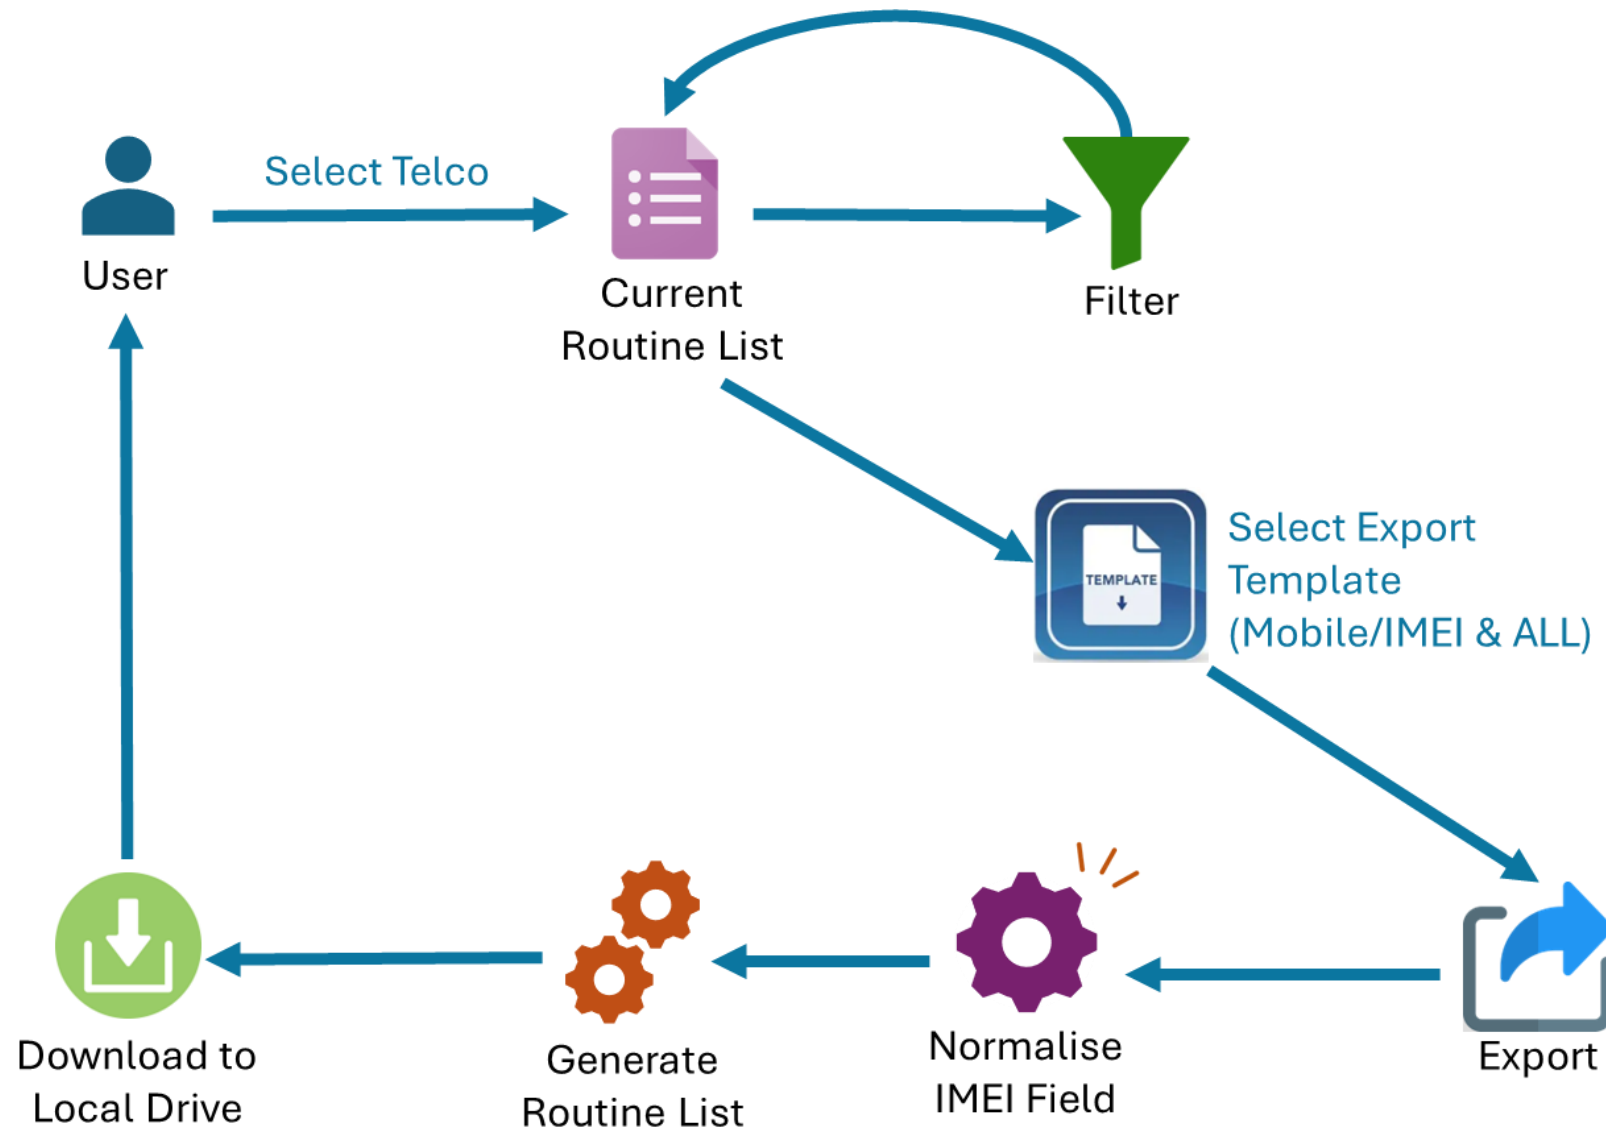

- Provide the capability of decrypting AES-Encrypted file.
- Upon
 - Uploading request forms or email;
 - Uploading CDR zip folders from Telcos;

Request Creation (CDR/SS/CTC)

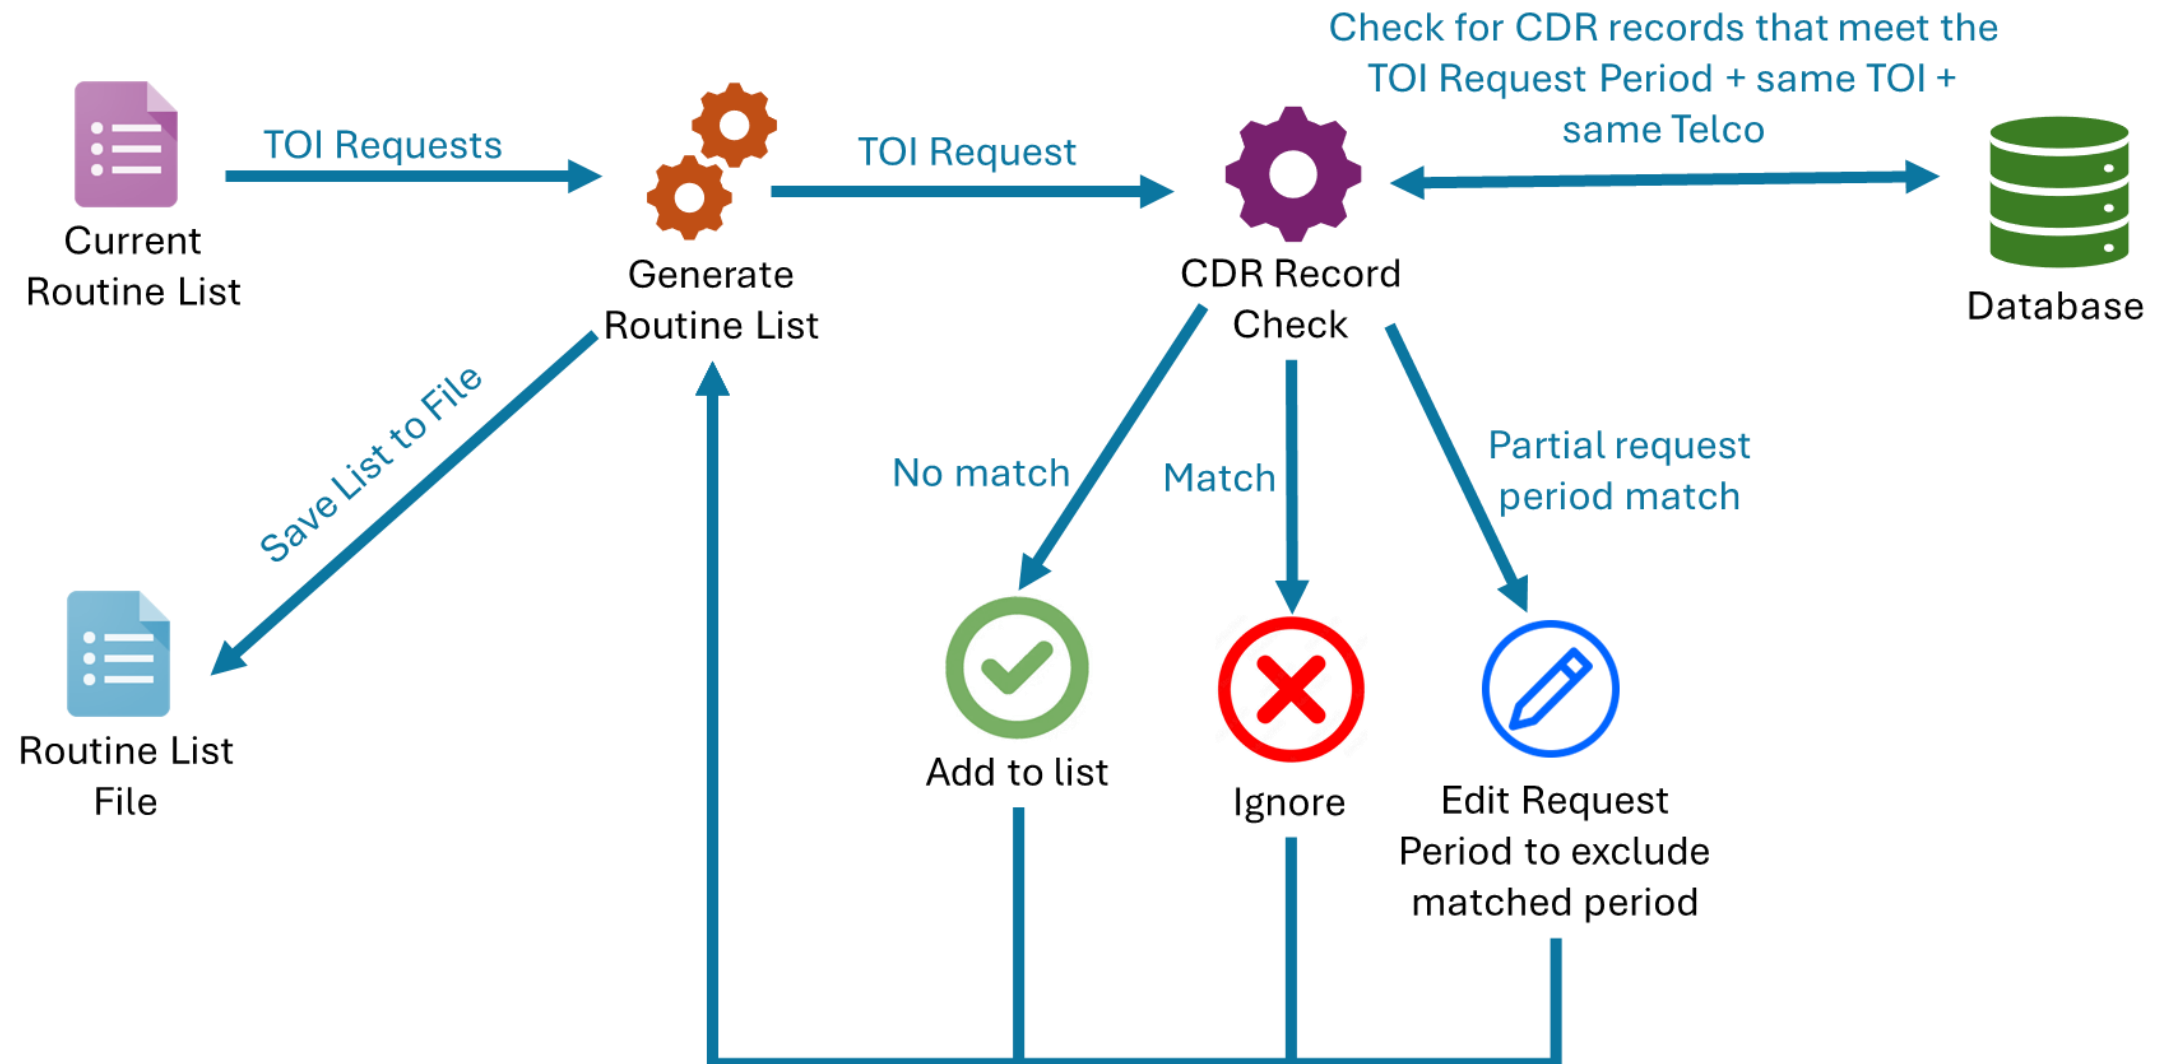

Request Data from Telco (CDR)

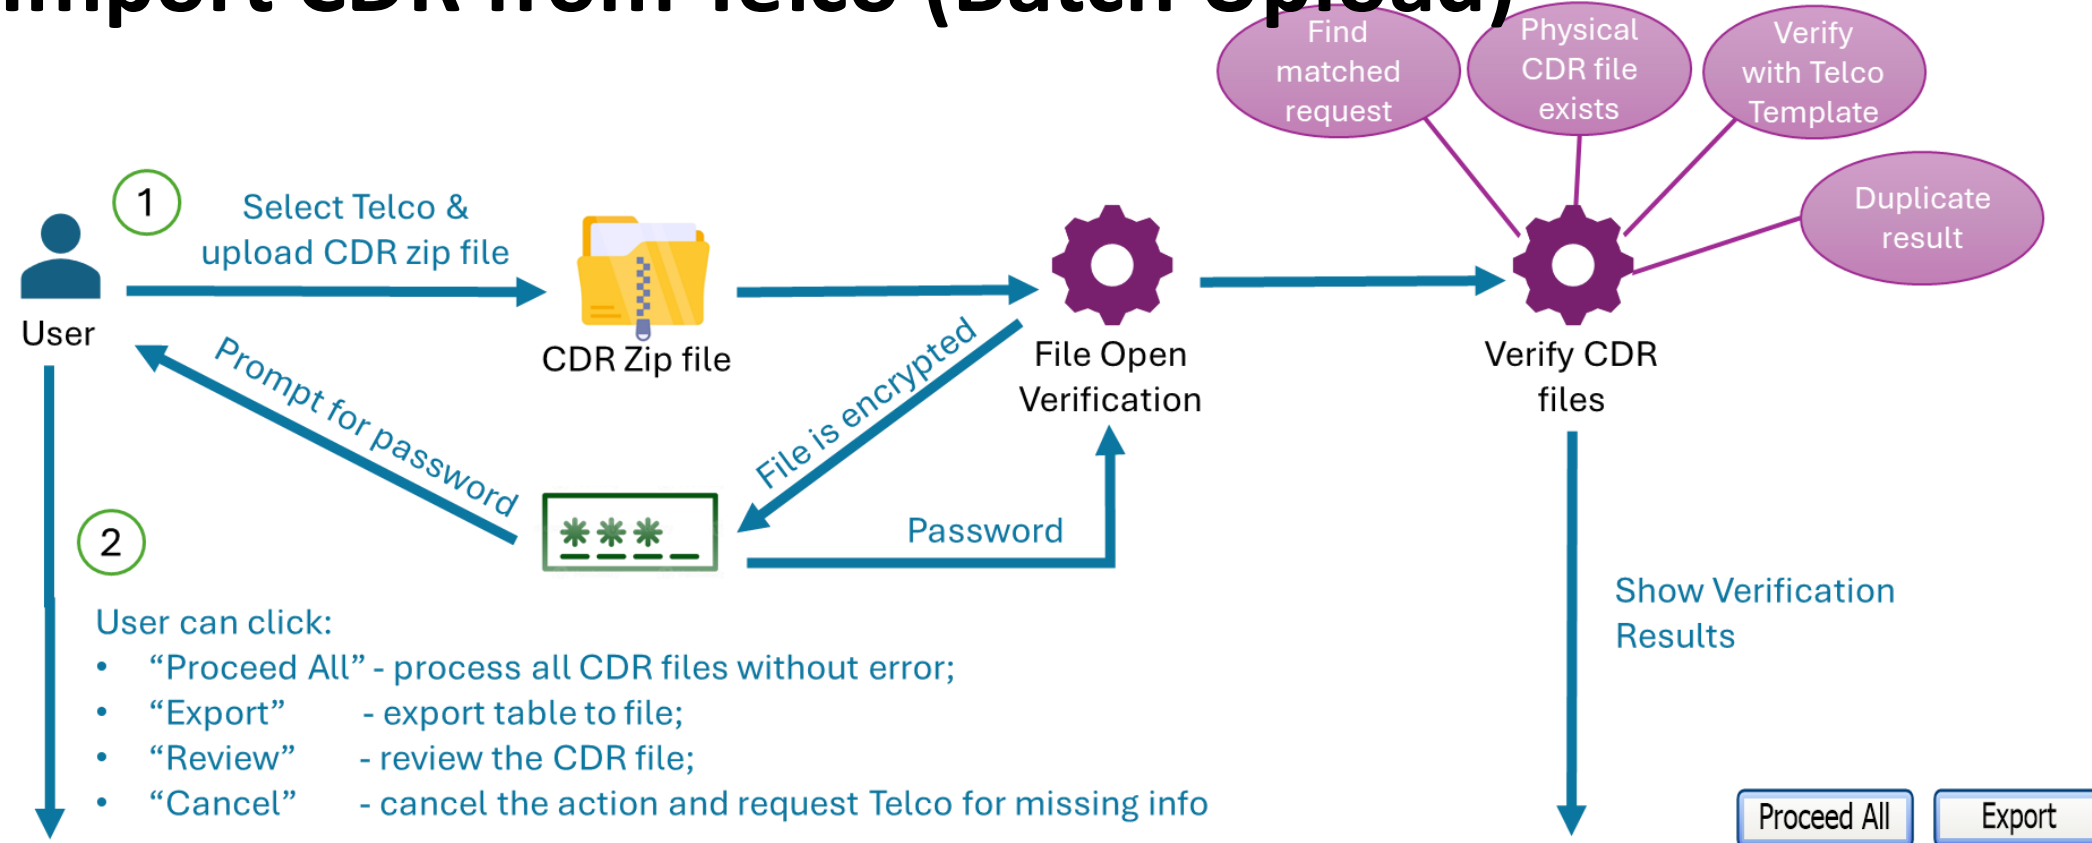

IMEI Normalisation

Take the 1st 14 digits from IMEI field and append "0" at the last digit.

Generate Routine List

Import CDR from Telco (Batch Upload)

TOI	Request Start Date	Request End Date	Request Found	CDR File Exists	Non duplicate	Valid Headers	Action	Status
92322544	13/08/2025	15/09/2025	✓	✗	N/A	N/A		Uploaded
94320343	13/08/2025	31/01/2026	✗	N/A	N/A	N/A		Error
91246743	15/08/2025	05/12/2025	✓	✓	✓	✓	Proceed	Pending
83205483	01/08/2025	01/11/2025	✓	✓	✓	✗	Review	Pending
83437745	29/07/2025	01/09/2025	✓	✓	✓	✗	Review	Pending
83423433	29/07/2025	01/09/2025	✓	✓	✗	N/A		Ignore

Verify CDR file with Telco Template (Review)

1 All column headers from CDR data file matches with template

	Template Header	CDR File Header
1	Date	Date
2	Time	Time
3	Subscriber No	Subscriber No
4	IMEI	IMEI
5	IMSI	IMSI
6	TIMSI	TIMSI
7	Duration	Duration
8	Answer Status	Answer Status
9	Destination No.	Destination No.
10	Call Dirn	Call Dirn
11	Roaming form	Roaming form
12	Call Type	Call Type
13	First_LAC	First_LAC
14	First_Cell	First_Cell
15	First_Start Location	First_Start Location

2 Extra column header detected from CDR data file

	Template Header	CDR File Header
1	Date	Date
2	Time	Time
3	Subscriber No	Subscriber No
4	IMEI	IMEI
5	IMSI	IMSI
6	TIMSI	TIMSI
7	Duration	Duration
8	Answer Status	Answer Status
9	Destination No.	Destination No.
10	Call Dirn	Call Dirn
11	Roaming form	Roaming form
12	Call Type	Call Type
13	First_LAC	First_LAC
14	First_Cell	First_Cell
15	First_Start Location	First_Start Location

3 Missing column header detected from CDR data file

	Template Header	CDR File Header	Ignore?
1	Date	Date	
2	Time	Time	
3	Subscriber No	Subscriber No	
4	IMEI	IMEI	
5	IMSI	IMSI	
6	TIMSI	TIMSI	
7	Duration		<input checked="" type="checkbox"/>
8	Answer Status	Answer Status	
9	Destination No.	Destination No.	
10	Call Dirn	Call Dirn	
11	Roaming form	Roaming form	
12	Call Type	Call Type	
13	First_LAC	First_LAC	
14	First_Cell	First_Cell	
15	First_Start Location	First_Start Location	

Select checkbox
to proceed with
data processing
with missing
column

Verify CDR file with Telco Template (Review)

4 Spelling error on headers in CDR. System unable to detect and match with template.

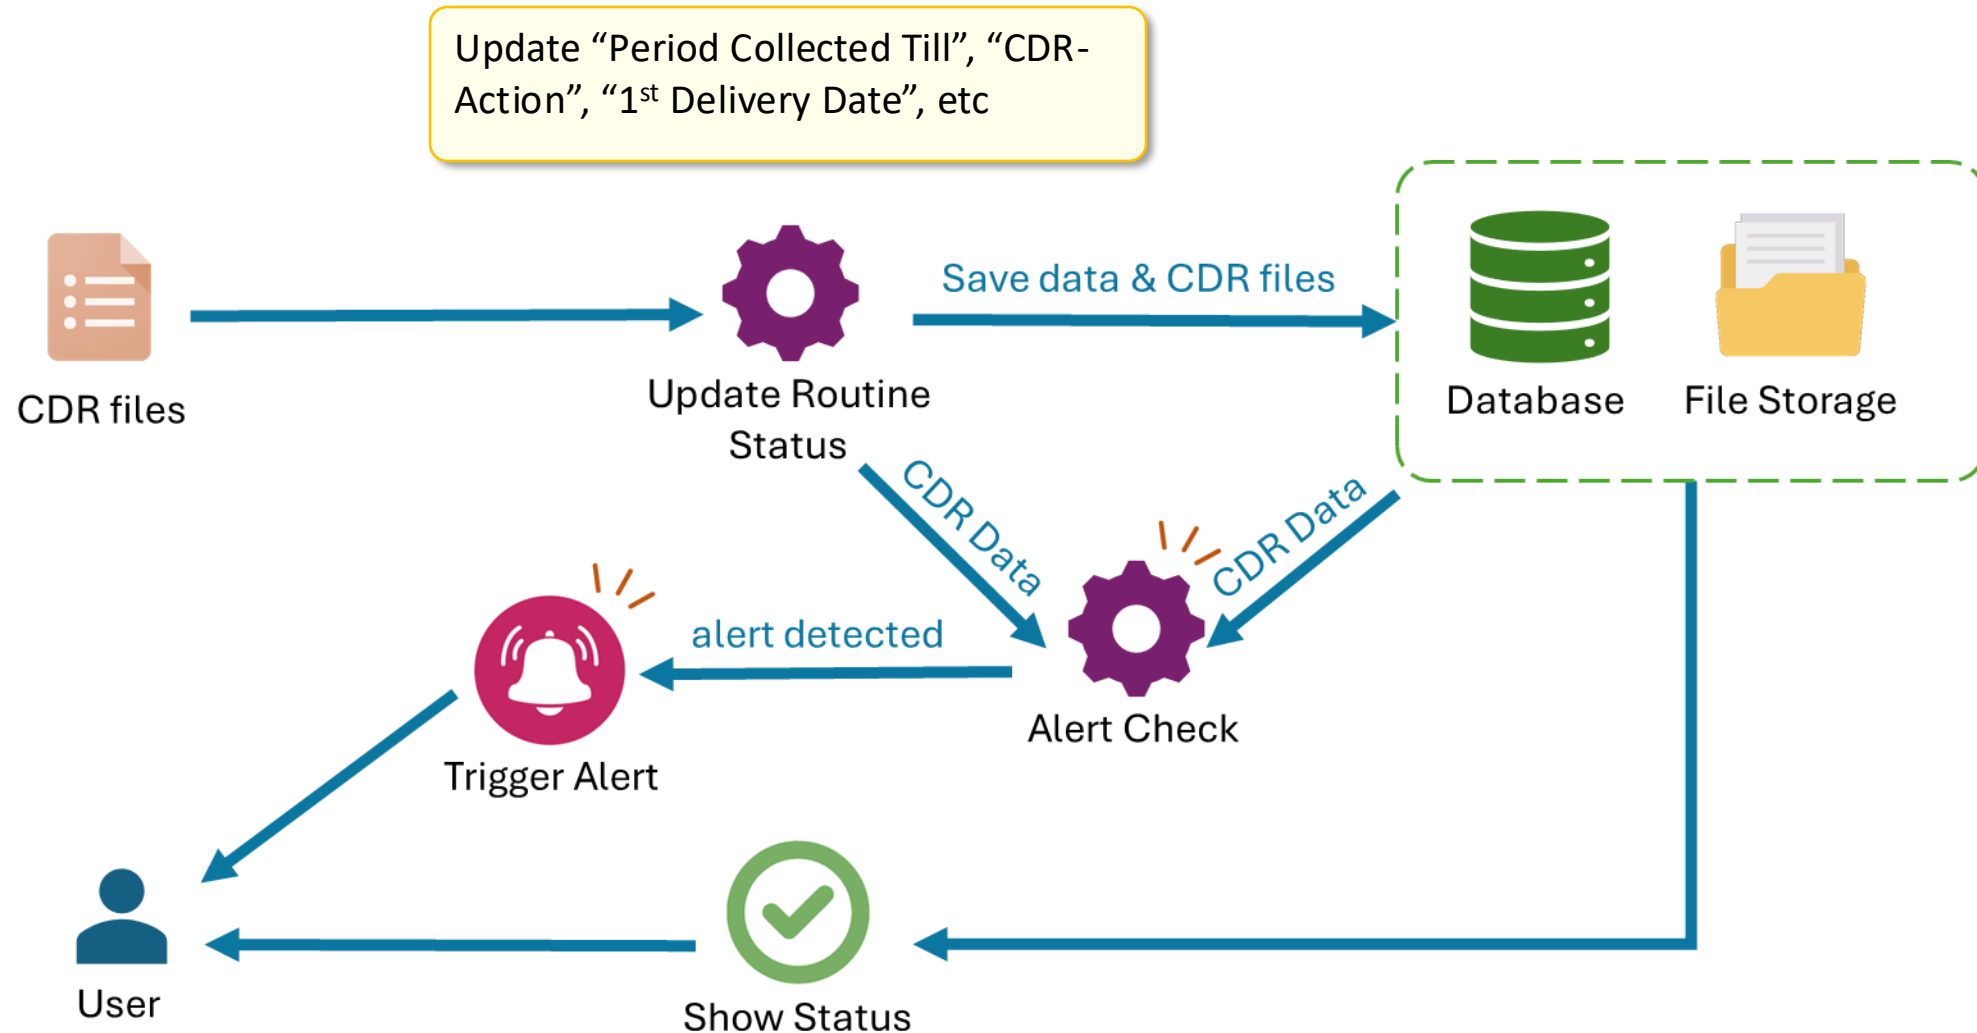

Template Header	CDR File Header	Ignore?
1 Date	<div><div></div><div>Dte</div><div>Tim</div></div>	<input type="checkbox"/>
2 Time		<input type="checkbox"/>
3 Subscriber No	Subscriber No	
4 IMEI	IMEI	
5 IMSI	IMSI	
6 TIMSI	TIMSI	
7 Duration	Duration	
8 Answer Status	Answer Status	
9 Destination No.	Destination No.	
10 Call Dirn	Call Dirn	
11 Roaming form	Roaming form	
12 Call Type	Call Type	
13 First_LAC	First_LAC	
14 First_Cell	First_Cell	
15 First_Start Location	First_Start Location	

Template Header	CDR File Header	Ignore?
1 Date	Dte	<input type="checkbox"/>
2 Time	<div><div></div><div></div><div>Tim</div></div>	<input type="checkbox"/>
3 Subscriber No	Subscriber No	
4 IMEI	IMEI	
5 IMSI	IMSI	
6 TIMSI	TIMSI	
7 Duration	Duration	
8 Answer Status	Answer Status	
9 Destination No.	Destination No.	
10 Call Dirn	Call Dirn	
11 Roaming form	Roaming form	
12 Call Type	Call Type	
13 First_LAC	First_LAC	
14 First_Cell	First_Cell	
15 First_Start Location	First_Start Location	

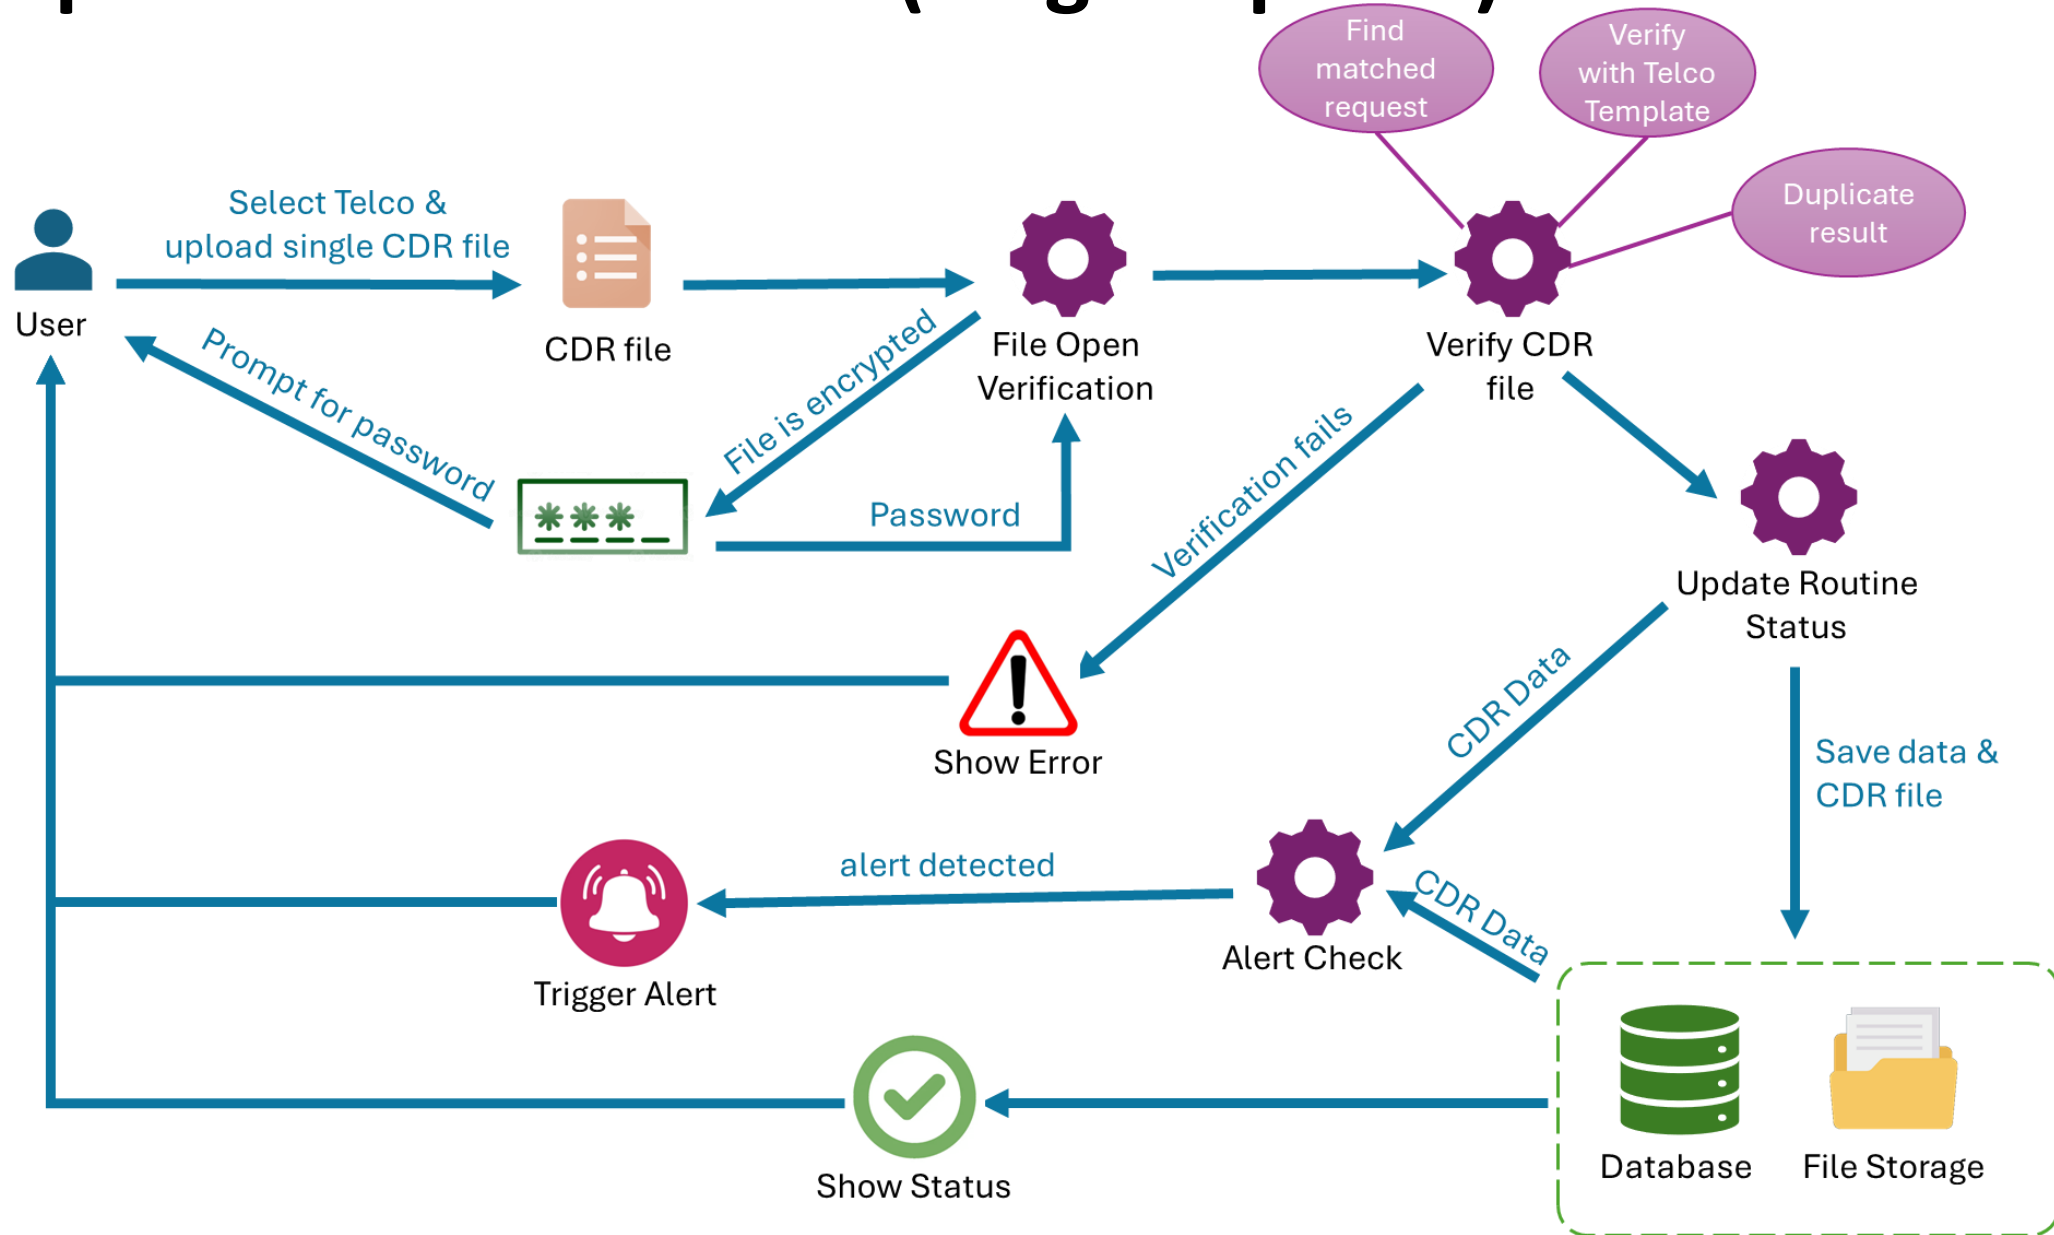

Template Header	CDR File Header	Ignore?
1 Date	Dte	<input type="checkbox"/>
2 Time	Tim	<input type="checkbox"/>
3 Subscriber No	Subscriber No	
4 IMEI	IMEI	
5 IMSI	IMSI	
6 TIMSI	TIMSI	
7 Duration	Duration	
8 Answer Status	Answer Status	
9 Destination No.	Destination No.	
10 Call Dirn	Call Dirn	
11 Roaming form	Roaming form	
12 Call Type	Call Type	
13 First_LAC	First_LAC	
14 First_Cell	First_Cell	
15 First_Start Location	First_Start Location	

- Users must manually match the CDR columns to the template headers.
- Any misspelled column headers that were not automatically detected should be selected by the user from a dropdown list.

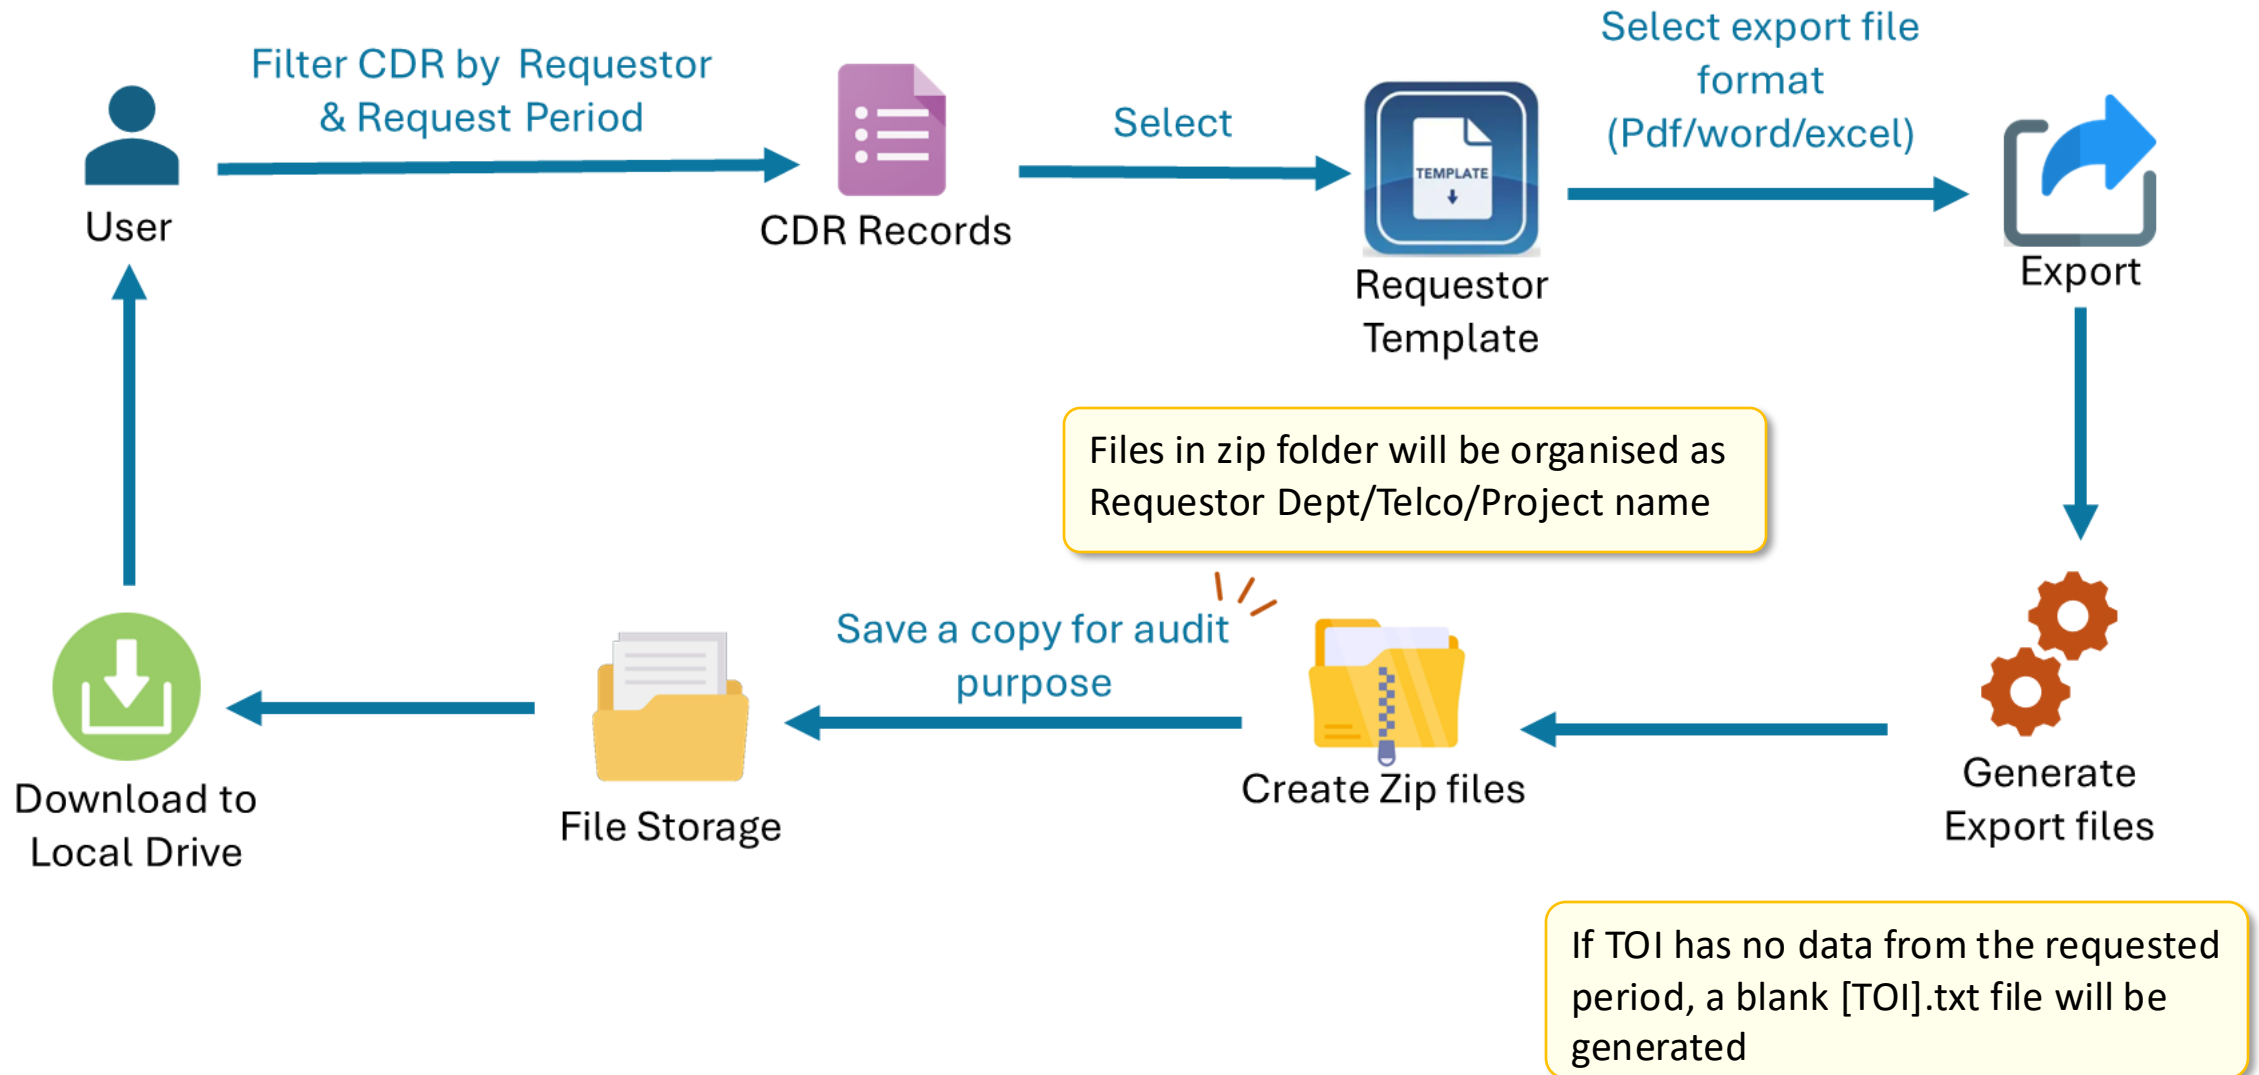

Import CDR data from Telco (Batch Upload - Save)

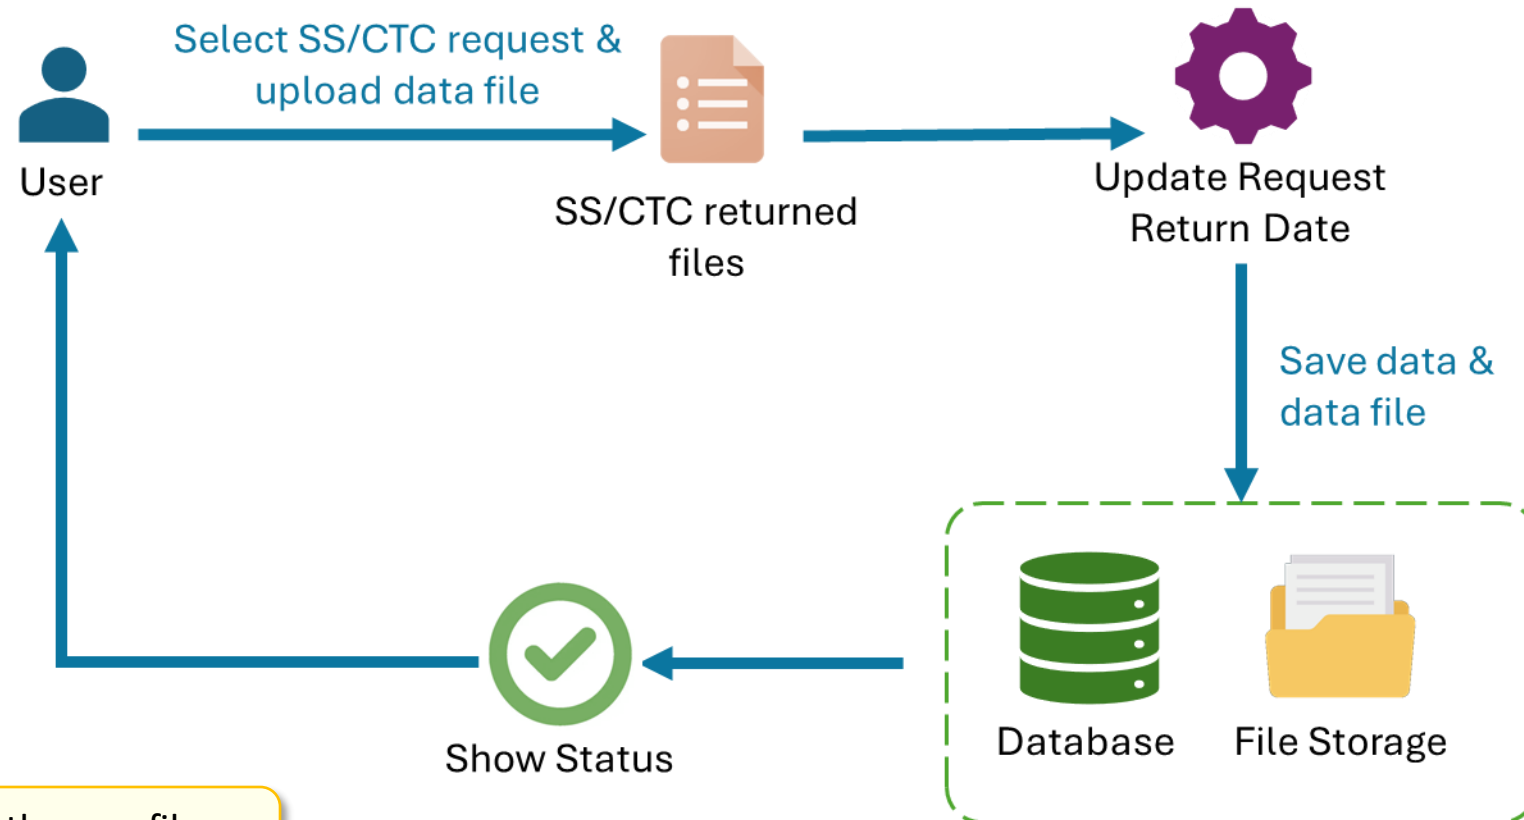

Import Data from Telco (Single Upload)

Request Delivery (CDR)

Import data files for SS/CTC requests

The purpose is to keep the raw file and no need to process the file

Change Service Provider

TOI: 91234567
Period: 1st Aug 25 to 31 Aug 25
Telco: ST
Status: Active

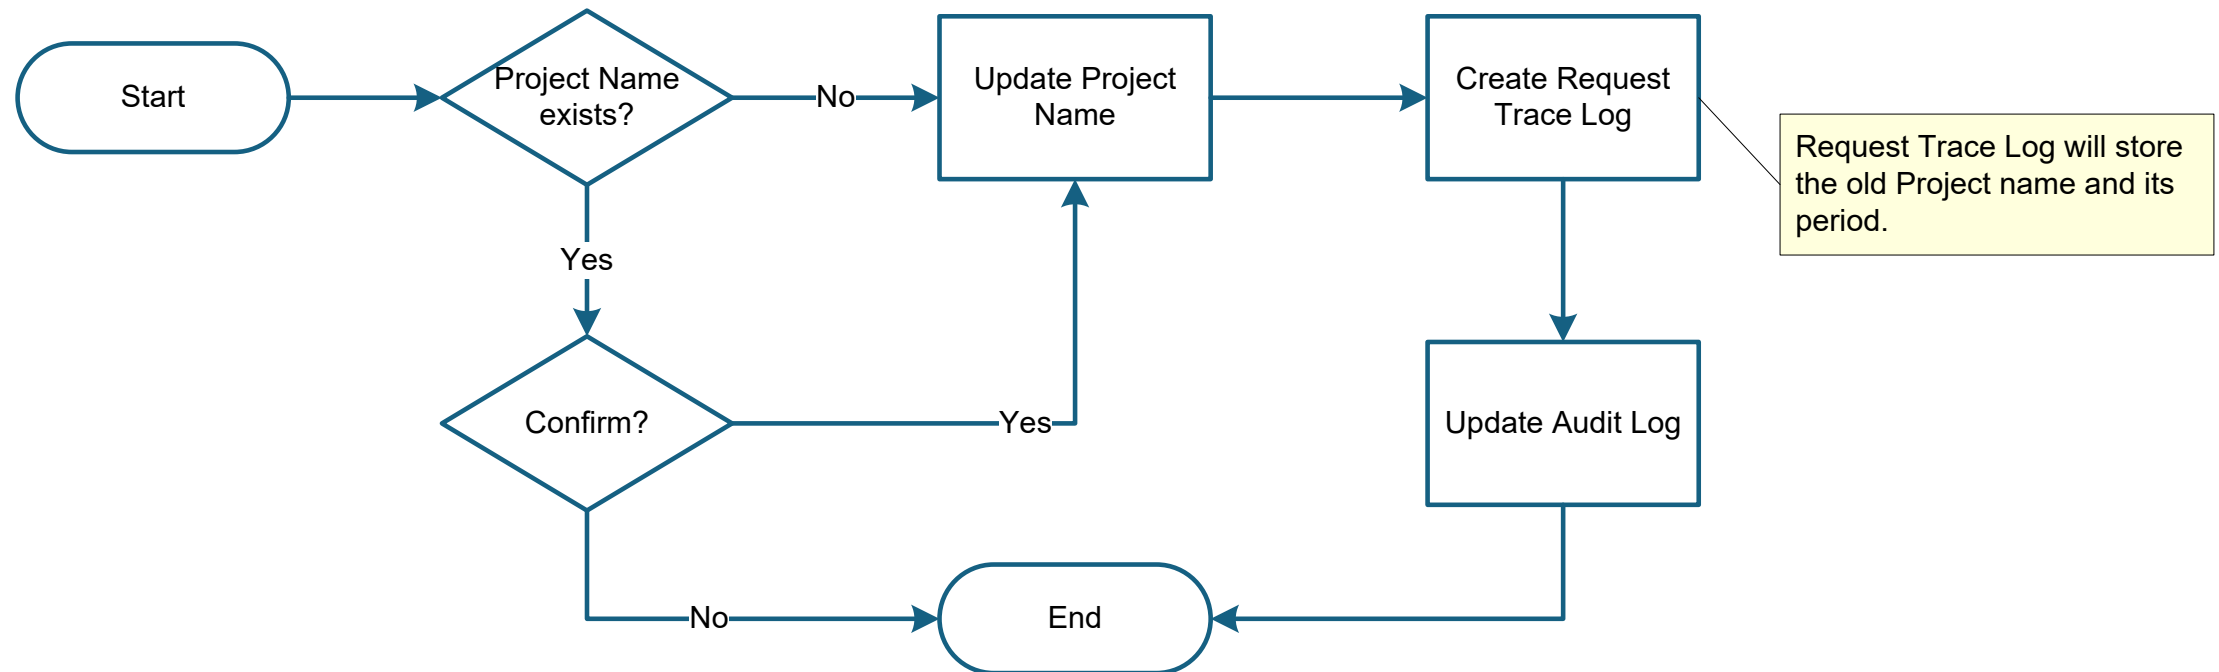

TOI: 91234567
Period: 1st Aug 25 to 12 Aug 25
Telco: ST
Status: Ported

TOI: 91234567
Period: 13 Aug 25 to 31 Aug 25
Telco: M1
Status: Active

Change Project Name

- Two types of changes:
 - Change Project name to existing Project name
 - Change Project name to new Project name

Report Templates

- Estimated 25 report templates (including ad-hoc, which not frequent)

Reports	Format
Shirt Return Report (Day/Night/Management/Urgent)	Excel
Monthly Report (Statistics/Telco)	Excel
Routine list (Weekends/weekday)	Excel
Ad hoc Statistics Report (Telco/Requestor/Project/Yearly/Monthly/Type...)	Word/PDF
Comparison Report with Graph/Charts representation	Word/PDF

- Formulas includes:
 - pivot table, total, highest, lowest, median, avg, ratio etc - est 15 formula
- We will re-visit the other report templates during workshop

Alerts

- DBMS shall able to show alerts on the screen based on the rule-based conditions as shown in the Alert Templates below.
- Types of alert:
 - Change IMEI;
 - Change IMSI;
- Alert is configurable by the user
- Alert notification:
 - Alert Icon  shown at status bar;
 - View the alert trigger time and details;

Alert Templates	
Field	Value
Alert Name	91234567 change IMEI Alert
Entities	91234567
Time Period – Start	2 nd Aug 2025
Time Period – End	7 th Aug 2025
Event	Change IMEI

Event: Change IMEI / Change IMSI

Data Migration Tool[!]

- Data Migration from Access database to DBMS:

Challenges

- No access to current Access database

Proposed Approach

- User to provide the Access database schema;
- User export data from Access to Excel file according to Access database schema;
- EAS to provide a data migration tool:
 - Import the excel file;
 - Read the file and populate data to DBMS database;

DBMS UI Demo

Thank you!
